

PREVENT™ KIT FOR NEGATIVE PRESSURE WOUND THERAPY

CLEARCHOICE
THERAPEUTICS

ELEVATE WOUND CARE WITH INNOVATION DESIGNED FOR ENHANCED HEALING AND PATIENT COMFORT.

The PREVENT Kit is an advanced NPWT dressing kit designed for use with CCT Mini or CCT1 drainage pumps. It replaces traditional foam with an innovative honeycomb design. Its thin profile reduces storage needs, while its soft, conformable material improves patient comfort. The PREVENT Kit reduces dressing change time and labor costs, offering a compelling alternative for wound care.

PREVENT on a wound care model

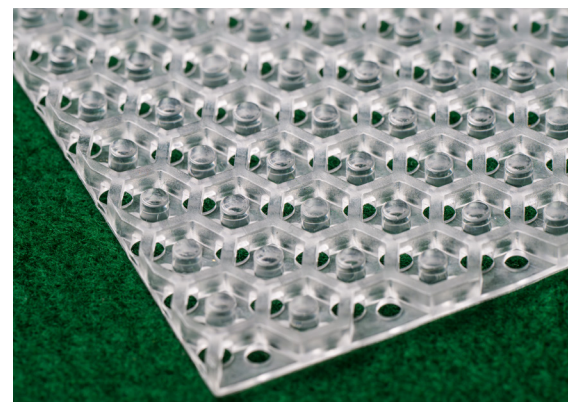

Why PREVENT?

- Clarity allows visualization
- No tissue ingrowth
- No healthy tissue removal
- Less painful dressing changes
- May prevent bacterial overgrowth
- Eliminates malodorous dressings
- No collapse under negative pressure

INNOVATIVE TECHNOLOGY

HONEYCOMB DESIGN: Unlike traditional foam dressings, the PREVENT Kit's unique geometry promotes efficient fluid distribution, even under compression, for wound drainage.

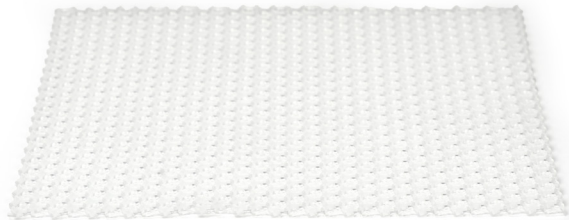

CLEAR & THIN PROFILE: Clarity provides wound visibility, and the thin profile reduces storage needs by up to 79%.

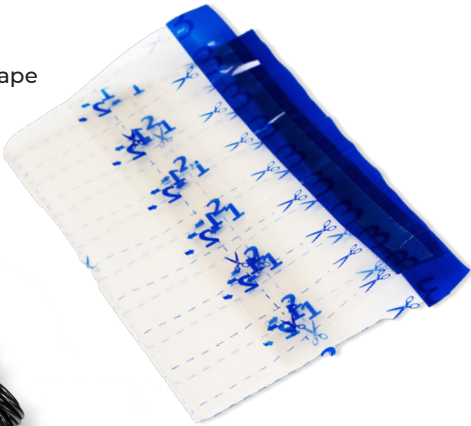

PREVENT KIT | SYSTEM COMPONENTS

① Prevent Barrier

② Drape

③ CCT Mini Charger

④ CCT Mini Pump

⑤ CCT Mini Pump Canister (300 ml)*

*Large CCT Pump (900 ml) available

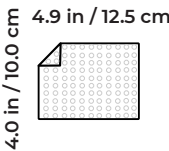

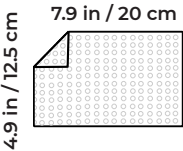

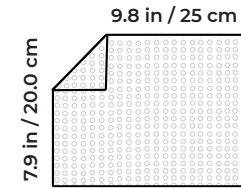

⑥ Dome Assembly

PRODUCT SPECS

SKU	Product	Size	Quantity
UNPRE2025	PREVENT Kit	Large	10/case
UNPRE2013	PREVENT Kit	Medium	10/case
UNPRE1013	PREVENT Kit	Small	10/case

PRODUCT DIMENSIONS

Dressing thickness - 0.3 in / 0.6 cm
